WELCOME TO OUR HANDS-ON APPROACH

We teach practical, hands-on workshops—80 percent "doing", 20 percent listening—geared toward actively engaging students and focusing on improving their skills to maximize the operational performance of Omnicell technology.

Our "how-to" training approach provides attendees with the comprehensive knowledge they need to efficiently perform the tasks required to take ownership of their Omnicell System.

WITH CLASSES BUILT TO MEET YOUR NEEDS

We provide a wide range of comprehensive customer training classes, from basic user training to training for advanced system administrators.

OMNICELL'S EDUCATIONAL ROADMAP CHOOSING YOUR COURSE

OUR COMMITMENT TO CUSTOMERS

Omnicell is committed to helping customers meet the challenges of learning new technologies implemented at their healthcare facilities.

INSTRUCTOR-LED COURSES OUR HANDS-ON APPROACH

COURSES AT OMNICELL HEADQUARTERS

Instructor-led courses are practical, hands-on classes where customers learn to fully utilize Omnicell solutions. The courses are taught by our Education and Training Services Department and are located at our headquarters in Mountain View, California.

ON-SITE COURSES AT YOUR FACILITY

The courses listed below can also be offered at your site. Omnicell's on-site classes feature curriculum designed to meet your facility's needs and build core competencies in Omnicell technology.

On-Site Mobile Cart Service Training
Advanced On-Site Pharmacy System Administrator
Advanced On-Site Supply System Administrator

TECHNICAL PROGRAMS FOR SERVICE TRAINING

Hands-on training is the only effective way to train Omnicell customers who service their own equipment. Our experienced technical trainer draws on in-depth knowledge of Omnicell equipment and years of training experience to provide a practical, interactive learning environment.

Students have the opportunity to resolve key issues on the equipment allowing them to troubleshoot and take corrective action under controlled conditions.

Omnicell offers three technical training programs:

BioMedical Service Training
Mobile Cart Service Training
On-Site Mobile Cart Service Training

Instructor-hosted webinars are live, interactive, onehour sessions providing System Administrators with key information about utilizing Omnicell technology. Webinars are offered several times each week.

New topics are added to our schedule each quarter. Current webinar topics include:

PHARMACY
