

Omniceil G4 Automated Dispensing Platform

Take medication and supply management to the next level. As a company that carefully listens to our customers, stays on top of changing regulations, and takes advantage of the latest technology, Omnicell has consistently delivered relevant, meaningful innovations for nearly two decades.

In continuing this heritage, we are proud to introduce the Omnicell® G4 (fourth generation) automated dispensing cabinet. The G4 platform offers new features and functionality that allow you to make great strides in patient safety, efficiency, compliance, and security. In addition, the new console significantly improves the way your nursing and pharmacy staff access and interact with the Omnicell cabinet.

With the release of Omnicell Software 15.0, now is a perfect time to upgrade your Omnicell automated dispensing cabinets and roll out a comprehensive suite of new features and functionality to your staff.

G4 Cabinet Console Highlights

- Larger, high-resolution display with redesigned interface improves user experience.
- Medication Label Printer—a new Omnicell innovation—enhances patient safety and efficiency.
- Improved Touch & Go™ G4 biometric ID system offers quick, easy, and secure access to the cabinet.
- Latest technology from Microsoft and Intel delivers superior performance.
- Modular console upgrade extends the value of your Omnicell investment by incorporating the latest technology into your cabinets.

New Display/Interface Is Easier to See and Use

The G4 cabinet console has a large, high-resolution display screen and redesigned graphical user interface based on input from a leading design firm and feedback from over 100 Omnicell users. The new interface focuses the user's eye on the most important information, making it easier for busy, rushed staff to correctly retrieve medications and perform other tasks.

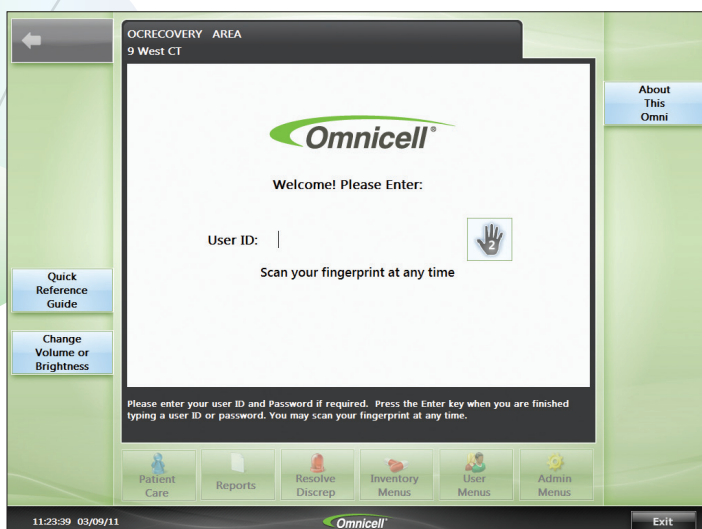

- Better readability, particularly for aging nurse population.
- 96% of nurses found the G4 cabinet display very easy to read, and 95% of nurses were satisfied with the appearance of critical information.¹

Secure, Convenient Access with the New Touch & Go G4 Biometric ID System

With the G4 platform, Omnicell introduces a completely redesigned biometric ID system. Touch & Go G4 not only incorporates state-of-the-art biometrics hardware and software, but also features an intelligent user interface that interactively guides users through the enrollment process every step of the way. User experience with the new system has been overwhelmingly positive.

- Fast, secure access via Touch & Go single-factor authentication, which enables users to access the cabinet via fingerprint scan only.
- Easy, guided enrollment with intelligent enrollment process.
- Alternate finger enrollment ensures consistent access to the cabinet in case the primary finger is not available due to a cut, injury, bandage, etc.
- Proven to stand up to challenges posed by dry, damaged, or lotioned skin.
- NIST and FIPS 201 certified.²

Help Prevent Medication Errors with Medication Label Printer

A unique new capability offered only by Omnicell, the integrated Medication Label Printer allows nurses to print patient-specific labels during medication issue for medications that won't be administered immediately; medications removed from their original packaging; pre-mix intravenous IV admixtures and multi-use medications, such as topicals, inhalers, and eye drops.

This feature allows you to comply with the Joint Commission National Patient Safety Goal 03.04.01 regarding labeling medications, and improves patient safety in your hospital.

- No need to handwrite labels—saves nurse time and eliminates workarounds that can lead to medication errors.
- Saves nursing and pharmacy time by reducing missing doses of multi-use medications.
- An ideal option for SinglePointe™ users: patient-specific medications can be labeled as soon as they are removed from the cabinet.

Improved Security and Performance from IT-friendly G4 System

Leveraging the latest technologies from Intel and Microsoft, Omnicell has made significant hardware and software enhancements in the G4 platform, improving reliability, security, and responsiveness and return on investment. These advancements ensure a positive user experience with minimal need for IT support.

- Microsoft® Windows® 7 operating system improves system security and performance and assures long-term support.
- Latest Intel® Core™ multi-core processor boosts performance.
- More responsive—busy staff will appreciate faster screen changes.
- Universal eBox (electronics) used across the Omnicell product line ensures efficient service.

Protect Your Investment with Omnicell Modular Upgrades

Our modular approach to upgrades enables you to keep current with technology without the hassle and expense of whole product replacement. The G4 upgrade brings your cabinet up to date today and assures that your Omnicell investment will continue to meet your needs into the future. The Omnicell system supports different cabinet software versions, so you have flexibility to upgrade cabinets at your pace. In addition, with the Microsoft XP end-of-life scheduled for April 2014, this upgrade extends the asset value of your Omnicell investment.

Take your Omnicell systems to the next level.

Contact your Omnicell representative today to learn more about the state-of-the-art G4 automated medication and supply dispensing system platform.
