How far can you reach?

Technology with a human touch
**OMNICELL AUTOMATION AND ANALYTICS**

*Operate leaner with unified medication and supply management*

Our Unity enterprise platform helps prevent errors and cuts out extra steps from medication and supply management, so your staff can focus more on patient care activities. The technology easily scales to health care facilities of all sizes, from post-acute care to integrated delivery networks (IDNs).

- Centrally manage your system—single server reaches across multiple sites and time zones
- Streamline clinical workflow through interoperability with EHRs
- Benefit from lowest cost of ownership based in part on our modular architecture
- Stay current through regular software upgrades included with our industry-leading service programs

*Omnicell systems share a single database—helping to reduce complexity, eliminate redundant work, and prevent errors.*
OMNICELL MEDICATION ADHERENCE

Extend your reach beyond the hospital to reduce readmissions

It’s no secret that lack of medication adherence contributes to hospital and nursing home admissions. Blister card packaging and technology that organizes multiple medications by time of day has proven to help patients stick with their prescribed therapy. Omnicell is a leader in both single dose and multimed adherence packaging. We offer a wide range of packaging options, supplies, and equipment to improve medication management and support medication adherence initiatives aimed at reducing readmissions.

OMNICELL KLAS AWARDS¹

#1 Overall pharmacy automation equipment vendor (2013 – 2014)

Best in KLAS
Automated Medication Dispensing Units: 2010 – 2014

Category Leader
• Automated Medication Dispensing Units: 2006 – 2011²
• Anesthesia Cabinets: 2011, 2014
• Controlled Substance Management Systems: 2013 – 2014
• High-Volume Unit Dose Packaging: 2013 – 2014
• Medication Carousels: 2010 – 2014
Pharmacy staff is under pressure to influence patient outcomes, yet medication distribution tasks seem never-ending. You can meet this challenge with our suite of systems that automate the daily operations of central pharmacy.

- **Increase productivity**
- **Tighten inventory accountability**
- **Reduce costs and shrinkage**

Are you bogged down with labor-intensive processes?
- Automate the ordering, receiving, stocking, and picking processes using WorkflowRx™ and Central Pharmacy inventory management systems.

- Get space-saving automated storage for pharmacy inventory and reduce the chance of dispensing errors with the Omnicell medication carousel.

- Efficiently create unit dose packages from bulk stock and support bedside bar code verification systems with an Omnicell medication packager.

What happens to controlled substances after they leave the pharmacy?
- You’ll have true closed-loop accountability of narcotics—from the loading dock, to the bedside, and back to pharmacy—with our Controlled Substance Management System (CSM).

How many extra phone calls are caused by misplaced medication orders?
- Expedite delivery of physician orders to the pharmacy and eliminate interruptions caused by misplaced or delayed paperwork with the OmniLinkRx™ medication order management system.
Great River Medical System Results From WorkflowRx³

- Cut pharmacy inventory in half: one-time reduction of $400,000
- Estimated ongoing annual savings of $300,000
- Reduced delivery time of patient medication from 1.5 hours to 30 minutes

³ Great River Medical Center, Burlington, IA, 2012 installation.
Help your nurses eliminate wasted steps from medication processes and spend more time with patients with the unique innovations in the Omnicell® automated medication and supply dispensing system.

- **More efficient workflow**
- **Increased nursing and patient satisfaction**
- **Improved medication safety**

**How reliable are your automated dispensing cabinets?**
- Nurses can count on the durability and ease of use of Omnicell® automated dispensing cabinets (ADCs), which have received the highest KLAS ranking for the past 9 years. Our one-touch fingerprint system and guiding lights gives them fast yet secure access.

**Can you access the ADC via your EHR?**
- Interoperability between the Omnicell ADC and Cerner EHR saves nurses time by enabling medication dispensing functions to be done remotely within the EHR. Omnicell is working on similar integration with other HIT vendors.

**Wish you could improve nurse satisfaction and patient care at the same time?**
- Virtually eliminate tedious countbacks and time spent resolving discrepancies with the OmniDispenser™ single dose dispensing module.

- Allow nurses to manage medications in quieter areas where they are less likely to be interrupted and make errors with Anywhere RN™—the leading remote medication management software.

- Prevent dangers caused by unlabeled medications by using the Medication Label Printer integrated within the ADC instead of handwriting labels or risking not labeling at all.
• Help nurses reduce steps and safely transport medications from the ADC to the patient rooms with the Savvy™ mobile medication workstation.

How can you manage medical supplies more efficiently and reduce inventory costs?
• Eliminate the need for manual billing documentation and inventory use tracking with the Omnicell Supply Management* point-of-use automation system.

*Allows medical supplies to be managed on open shelves and/or secure automated dispensing cabinets.

Customer Results

• Missing doses decreased 30% (SinglePointe™)⁴
• Automated dispensing cabinet medication removal time decreased 33% (Anywhere RN)⁵
• 91% of nurses surveyed agreed that the label printer had a noticeable timesaving impact during their shift (Medication Label Printer)⁶

⁴ Based on Omnicell customer data.
⁶ Omnicell beta study results, South Jersey and Spaulding hospitals.
Omnicell systems for managing medications, tissue, and supplies in the OR and procedural areas ensure accountability while giving clinicians easy access to the items they need.

- **Dramatically increase charge capture**
- **Prevent delays caused by out-of-stock items**
- **Comply with medication security regulations**

**Are your anesthesia providers still using fanny packs for controlled substances?**
- Give clinicians instant access to medications and pharmacy tighter control with the Anesthesia Workstation™. It automatically tracks inventory used, cutting hours of manual documentation.

**How precisely are you monitoring supply costs?**
- More accurately capture costs for each case and tie it to the patient record with the OptiFlex™ SS (Surgical Services)* point-of-use automation system, which integrates preference cards with perpetual inventory tracking of surgical supplies.

**Is manual tracking making it difficult to follow up on recalls?**
- Easily capture unique device identification (UDI) to identify and locate recalled items such as implantables via OptiFlex CL (Cath Lab)*—a complete supply management system for procedure areas such as endoscopy and cath labs.

- **Automatically track tissue items** in compliance with Joint Commission standards with OptiFlex Tissue Tracking.

* OptiFlex systems allow medical supplies to be managed on open shelves and/or secure automated dispensing cabinets. Both the SS and CL systems have UDI tracking capabilities.
Billings Clinic Results With OptiFlex SS7

- Increased charge capture by over $1 million a year
- Labor savings of 5,000 to 7,000 hours per year
- Missing inventory of $300,000 to $400,000 per year down to almost zero

7 Billings Clinic Case Study, 2011.
With a comprehensive picture of usage and inventory, you can make better decisions. Pandora® analytics transforms data from multiple Omnicell® automation systems into an insightful dashboard.

- **Reduce medication and supply costs**
- **Save time on drug shortage management**
- **Improve diversion detection**

**How are you optimizing inventory?**
- **Get visibility to financial information** such as inventory costs and turns, item location, and costs per case or patient visit with Pandora Financials. Pandora can automatically push par level changes to your Omnicell® ADCs.

**Need to save time on drug shortage management?**
- **Item Locator and ASHP Item Shortage** functions reduce time spent managing shortage items: estimated savings of 20 minutes daily for each shortage item.

**How effective are your diversion detection efforts?**
- **Rather than waiting for a monthly report** or spending hours sifting through data, use Pandora Clinicals to easily view anomalous usage and quickly drill down to specific user details.

**Customer Results**
- Saves approximately 1.5 hours a day on reporting
- Diversion cases have been detected within 3 days of the diversion starting
- Narcotic audits that once took 2 hours can now be completed in less than one minute

8 Stormont-Vail HealthCare, Topeka, Kansas.
9 Providence Saint Joseph Medical Center, Burbank, California.
10 University of Tennessee Medical Center, Knoxville, Tennessee.
11 Willamette Falls Hospital, Oregon City, Oregon.
With 10% of hospital readmissions and up to 25% of nursing home admissions caused by poor medication adherence, pharmacies can make an impact aided by Omnicell medication adherence solutions.

- Improve patient outcomes
- Simplify medication administration in post-acute care
- Deliver efficiencies for your pharmacy

How can pharmacies help patients stay adherent to their prescribed regimen after discharge?
- Give patients an easy way to avoid missing doses or doubling doses with RxMap® multiple medication adherence blister cards organized by time-of-day and day-of-the-week. RxMap has proven to help patients take the right medications at the right time.

How can you more efficiently fulfill adherence packaging?
- Offer multimed adherence services without significantly increasing pharmacy workload with the OnDemand® 400 for RxMap. This technology automates multimed card filling and interfaces with your existing pharmacy information system.

Tired of paying a premium for manufacturer unit dose packaging?
- Create your own inventory of bar coded unit dose medications for in-facility dispensing using MTS unit dose packaging and the MTS-350™ semi-automated filler and sealer

### Adherence Packaging Results
- Adherence rate increased from 22% to 97% with multimed blister packaging
- Patients’ confidence in taking their medications increased from 7% to 93%
- 36% of patients believed RxMap blister cards helped reduce ER visits and hospitalizations
