

We're changing the way you look at your TPA

Omnicell 340B

Introducing a fresh, new face for compliance, with the newly-redesigned Omnicell 340B (previously PSG 340B Link). Upfront, it features a modern UI with friendly, efficient navigation to the features you've asked for. On the backend, we've tuned up our proven qualification engine to make it even faster and more configurable than ever.

COMPLIANCE FIRST

We'll set up your program right, right from the start, configuring our rules-based engine to match the custom parameters you provide. Using our proprietary claims qualification methodology leveraging medication administration records, we believe we've set the industry's highest standard for compliance. Our impressive audit record proves the difference.

NEW! Use the robust new self-audit tool to sample transactions by a variety of criteria to monitor general program performance or specific areas of concern.

FAST START TO SUCCESS

Using our proven processes and tools, our speed to live just keeps getting better! You'll benefit from our existing pharmacy relationships, our automapping tool and our team of experts who will be by your side to ensure your program performs to expectations.

NEW! Switching from another TPA? Make switching a little less painful. Options include a free first-year audit, 60-day implementation with no implementation fees, or no admin fees for 90 days.

FLEXIBLE APPROACH TO MAXIMIZE PROGRAM VALUE

From our flexible data requirements, to our customizable qualification engine, to solutions for compliantly capturing nearly any 340B-eligible claim or dispensation — even those that fall outside of normal workflows — our team's goal is to make sure you reach yours!

NEW! Enhanced compound drug mapping tool makes it even easier to track 340B accumulations on ingredient medications.

MORE POWER IN YOUR HANDS

Improved transparency to your data gives you more opportunities to monitor and control the performance of your program. Customize your dashboard with the data that's meaningful to you — and drill into the details via a suite of new tools and customizable reports.

NEW! Find new tools for user administration, prescriber maintenance, reporting and self-audits for even more control over your program.

OMNICELL 340B SOLUTION FOR SPLIT BILLING AND OWNED RETAIL PHARMACIES

Manage hospital mixed-use and retail pharmacy 340B programs within a single solution designed to maximize compliance and minimize WAC purchasing. Omnicell leverages medication administration records for the industry's highest compliance standard for determining patient status when the drug is dispensed.

Simplify data ingestion via your EMR or other data feed

Easily access the data you need most in Interactive dashboards and reports with drill-down detail

Automatically convert up to 95 percent of your charge codes to NDCs with the auto mapping tool

Self-manage prescribers in real time

Accumulate 340B eligibility by covered entity or location

Manage DRA and Medicaid / Medicare requirements

Place orders directly with most wholesalers

View and adjust 340B / WAC / GPO splits before placing orders to maximize ordering efficiency

Simplify CSOS ordering with streamlined workflow

Map compound drugs for precise capture of 340B-eligible ingredient medications

Self-administer user access via two-approver system

OMNICELL 340B SOLUTIONS FOR CONTRACT PHARMACY, MAIL ORDER AND SPECIALTY

Omnicell optimizes your contract pharmacy network, simplifying program management and increasing program value effectively and efficiently. Thanks to strong pharmacy relationships, Omnicell is the only third-party administrator that can provide single-source access to any contract pharmacy — even CVS and Walgreens.

Leverage our proprietary claims qualification methodology designed to maximize compliance

Access the industry's most comprehensive network, including every national retail chain and more than 90 percent of specialty and disease-specific pharmacies

Get up and running quickly using a proven implementation process and team that consistently brings live hundreds of new pharmacy locations each quarter

Enforce compliance via a consistent patient definition across your entire 340B program

Improve capture rates for specialty and infusion medications with our expert guidance

Compliantly capture high-value 340B prescriptions requiring unique workflow steps, such as referrals and preauthorizations

Enhance program performance and maximize program value through our team's ongoing monitoring and recommendations

Leverage the self-audit tool to simplify monitoring for program compliance

Share 340B savings with patients using our patient care card solution to administer free or subsidized medications to select patients
