

How can your pharmacy have a holistic view of patient interactions while improving your overall workflow? Omniceil Patient Engagement

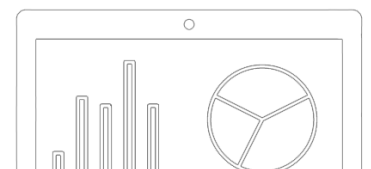

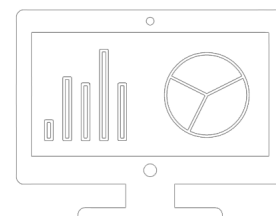

Omniceil Patient Engagement is a single, web-based platform that hosts all functionality to guide and track patient notes, interventions, and appointments. This solution provides the pharmacy with a holistic view of patients, not only by organizing prescriptions, but by identifying, preparing, and documenting ongoing patient engagement.

One Platform, Countless Solutions

- Integrates with pharmacy management systems (PMS), facilitating bidirectional data flow
- Uses predictive analytics to prioritize patient interventions and pharmacy tasks
- Tracks individual pharmacy performance to empower optimization of initiatives

Solution Benefits

- Streamline workflow to increase efficiency
- Eliminate the need to use multiple portals and remember different sets of login credentials
- Drive and manage Omnicell Medication Synchronization
- Increase script growth while reducing overall costs
- Manage and view patient communications as they occur
- Improve patient retention and patient acquisition

Patient Benefits

With consistent pharmacist-patient engagement, patients achieve better health outcomes and obtain piece of mind knowing that they fully understand their medication regimen.

Consistent Patient Care Opportunities

Pharmacies will be able to host all functionality on a single platform, including measuring and analyzing each program. The Omnicell Patient Engagement platform continuously improves patient interventions by offering additional patient care opportunities, such as Omnicell:

- Medication Synchronization
- Immunization Solutions
- MTM (medication therapy management)
- Health Plan Dashboards
- Targeted Patient Interventions
