

IMMUNIZATION

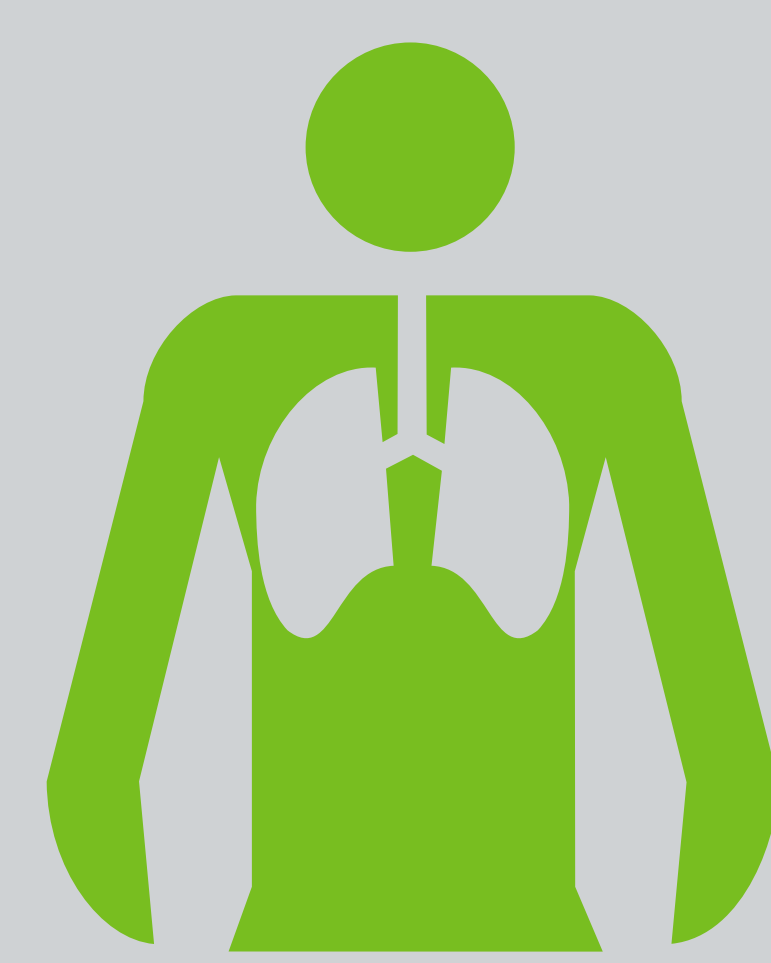

Disease Burden Among U.S. Adults

1 MILLION
cases of zoster (shingles) occur in the United States annually.¹

~\$10.4 BILLION

in direct medical costs in United States from influenza (flu).²

22,000 DEATHS

annually in the United States from pneumococcal disease (pneumonia).³

Pharmacy: A Vehicle for Driving Immunization Rates

250 MILLION people walk into a pharmacy **EVERY WEEK,**

providing pharmacists the opportunity to immunize patients.⁴

ALL 50 STATES

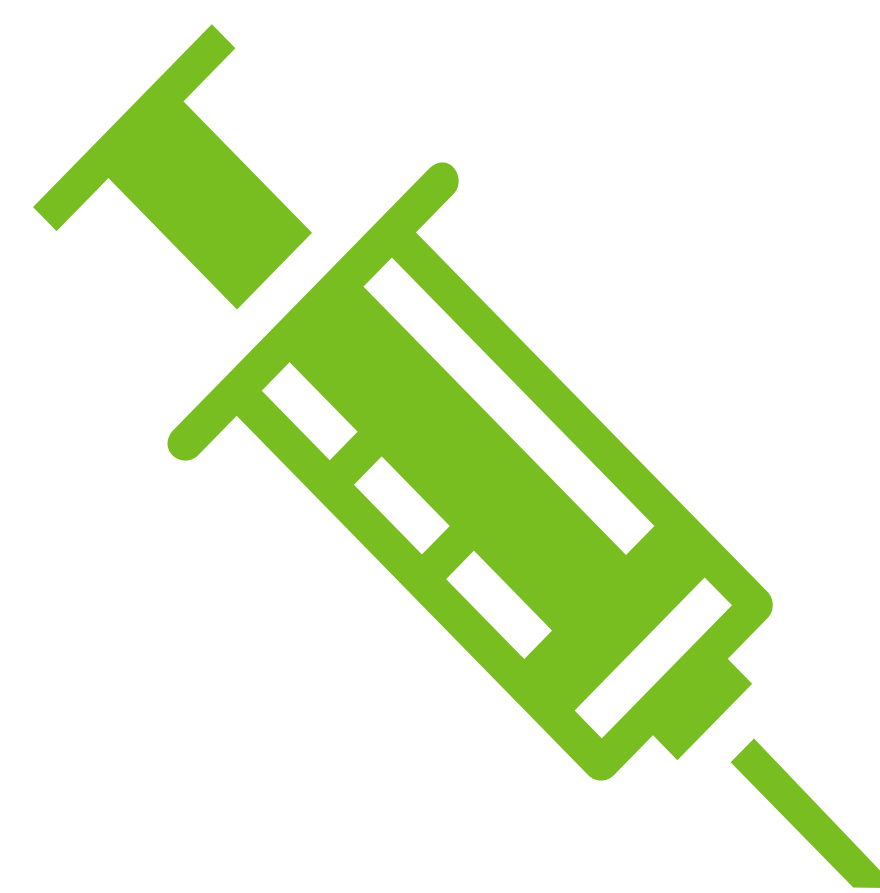

within the U.S. have Board of Pharmacy rules, allowing pharmacists to vaccinate.⁵

Studies show that individuals living in states where pharmacists can administer vaccines have

HIGHER OVERALL VACCINATION RATES

than individuals residing in states where pharmacists could not provide this service.⁶

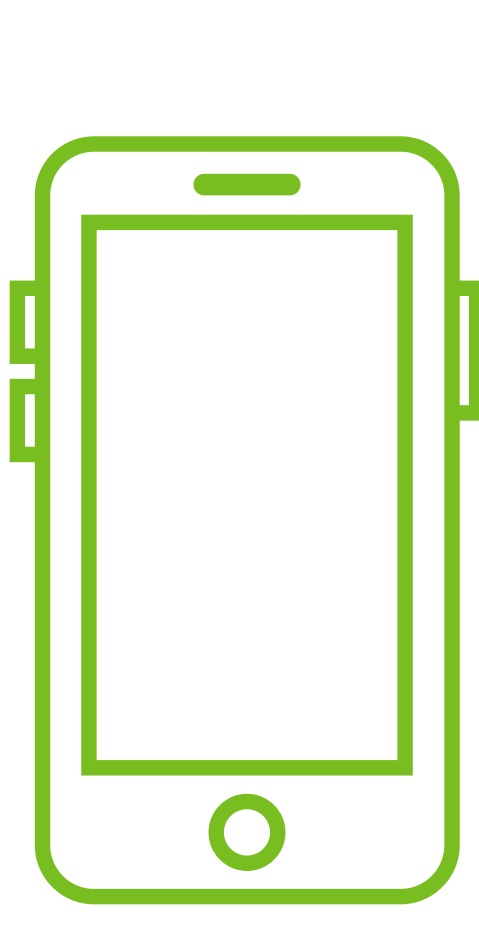

Omnicell's Pharmacy Partner Advantage

OMNICELL PATIENT ENGAGEMENT PLATFORM

A pharmacy-facing platform to manage patient interventions, provide guided patient care, and engage patients.

IDENTIFY, PINPOINT, & PRIORITIZE PATIENTS

who should receive CDC recommended vaccines, improving revenue growth and increasing vaccination rates.

Patients receive

AWARENESS MESSAGING

about important immunization opportunities.

PATIENT INTERVENTIONS

are available through an appointment scheduler to better engage patients.

TRACK & DOCUMENT

patient vaccination records and identify gaps in immunization opportunities in the Omnicell Patient Engagement platform.

Omnicell's State Registry Integration and Bidirectional Data Flow

With connectivity to individual state registries, pharmacies are able to obtain current, individualized

VACCINATION HISTORIES

If the state offers the ability to query the state registry, Omnicell is able to capture this information and build

TARGETED PATIENT LISTS

Bidirectional data flow empowers pharmacies to

HARNESS THEIR OWN DATA

and actively perform

TARGETED VACCINE ADMINISTRATIONS

Source List: Available upon request
