About Omnicell Medication Adherence

Omnicell is a trusted partner to long-term care (LTC), institutional, and hybrid pharmacies across the United States and in global markets including the UK, DACH region, Australia, and Canada. Our Medication Adherence division is dedicated to helping pharmacies improve patient outcomes through innovative packaging and automation solutions that enhance operational efficiency, medication safety, and adherence.

At the heart of the Medication Adherence business is our manufacturing facility in St. Petersburg, Florida, where we produce the wide range of high-quality blister cards, labels, and packaging components found in this catalog.

From single-dose and multimed blister cards to guided labeling software and automation platforms like E3 and Autogen, our Medication Adherence portfolio is designed to streamline workflows, reduce labor costs, and support compliance. This portfolio is part of Omnicell's broader suite of medication and medical supply management solutions across all settings of care.

Unit Dose Solutions

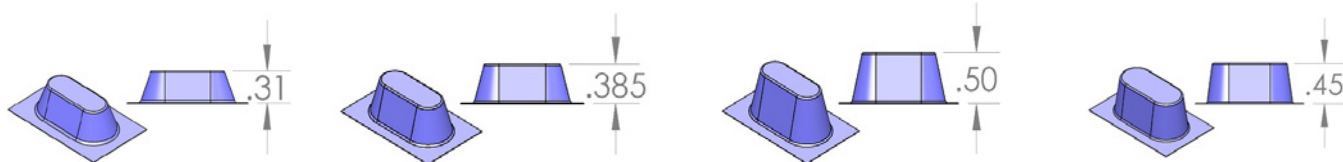

Omnicell's Unit Dose foil labeling system and supporting consumables, enable pharmacies to efficiently print, package, and seal medications into a unit dose form factor. This system is designed to support packaging of oral solids into single dose consumables for use in unit dose box, e-kits and automated dispensing cabinets, and reclaimable and non-reclaimable blister cards.

Blister Sizes & Accessories

We offer a variety of blisters in standard clear and amber. Standard Unit Dose Perforated Blisters are produced 32 per sheet (4x8). Select blister sizes are available in 14, 28, 30, and 31-dose.

Blister Sizes Small | Medium | Large | XL

Unit Dose Foil Labeling System

Omniceil's unit dose foil labeling system meets the unique needs of the long-term care pharmacy by producing high quality bar code scannable label sheets quickly and efficiently. This standalone system prints foil lidding containing all pertinent drug information and barcodes.

- Accommodate diverse packaging needs including unit-dose box, short-cycle dispensing, reclaimable blister cards, eKits and automated dispensing cabinets
- Reduce waste by pre-packing expensive medications into reclaimable blister cards (as allowed by state regulations)
- Track log numbers and expiration dates using barcode technology, with option of printable daily production report

Included

- Tharo H627 – 203 dpi thermal transfer printer
- Rotary cutter
- Labeling software program with database and report generator
- Barcode scanner with cable and stand
- Communication cables

Usage

This high-speed durable printer prints up to 18 sheets of Omnicell foil (576 unit doses) per minute. The printer automatically cuts the foil to size, making it ready for direct application to the unit dose blister. The Unit Dose Foil Labeling System can be used standalone or in conjunction with Omnicell automation.

Medication Packaging Equipment

With more than 30+ years of dependable products, Omnicell's Medication Packaging Equipment solutions are the backbone of institutional, LTC, and hybrid pharmacies.

Autogen™

The Omnicell Autogen Automated Heat Sealer sets the industry standard for automated heat sealers, helping your pharmacy enhance operational efficiency without requiring an air compressor. With the Autogen Automated Heat Sealer you can seal SureMed™ by Omnicell heat seal blister cards in under four seconds. Simply plug it into any standard 110V outlet to begin using its 500 pounds of sealing force.

- Whisper-quiet operation
- Safe two-handed operation to activate sealing mechanism
- Eliminates blister card pressure variants associated with manual sealing equipment
- Precision designed for hassle-free, reliable operation
- Enhanced airflow design creates lower heated-air emissions
- Rugged stainless steel and anodized aluminum construction allows for easy cleaning

SureSeal™

The Omnicell SureSeal Manual Heat Sealer is a programmable, manual sealer for pharmacies looking for an economic way to begin offering SureMed by Omnicell heat seal medication blister cards. The sealer is shipped completely assembled and includes a two-up configured blister card paddle.

- Easy-to-set temperature controls with digital display
- Ergonomic design reduces the physical effort associated with repetitive manual sealing
- Timer and automatic pop-up platen
- Digital pressure indicator
- All settings are preprogrammed

Deblister Machine

The Omnicell Deblistering Machine helps you effortlessly remove medications from blister card packaging, simplifying a once-tedious task. It can be used to deblister a variety of blister card types.

- Small and portable
- Hand-operated
- Deblisters the following dose cards:
30, 31, 32, 60, 62, 90
- Heavy-duty design
- Saves time and money

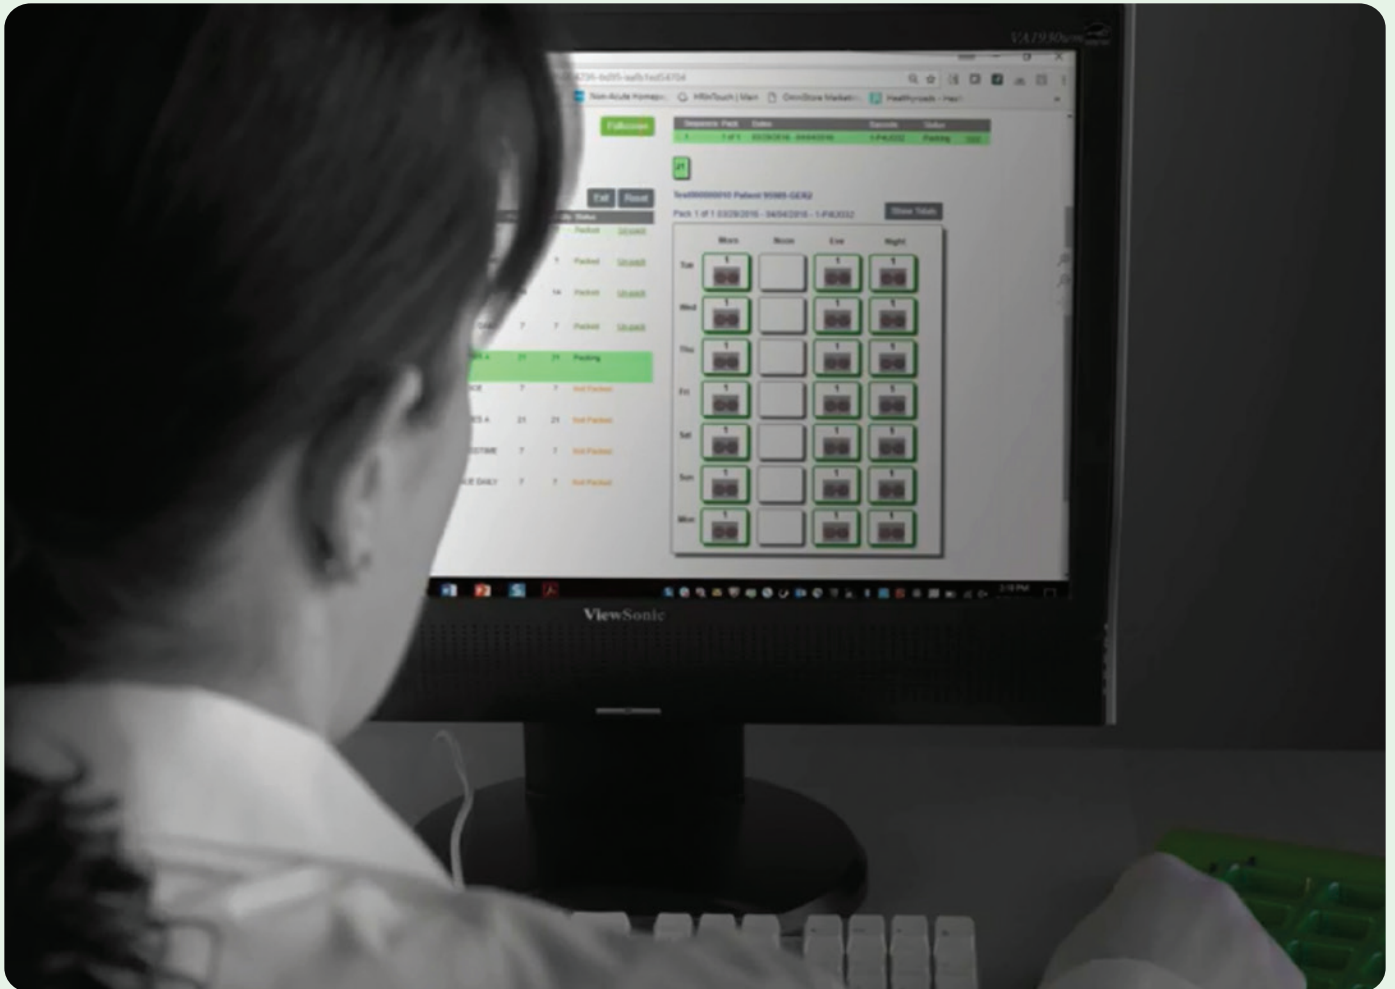

KirbyLester KL1v

The KL1v is designed for simplicity and accuracy, ensuring precise prescription filling and inventory management for pharmacies. Its compact design and easy set up make it ideal for pharmacies looking to reduce errors and optimize workflows.

- Use for fast inventory counting of bulk tablets and capsules
- Counting speed up to 15 tablets per second
- Compact design
- Counts almost any tablet or capsule without calibration, maintains absolute accuracy
- Special mode for odd-shaped pills and gel caps
- Standalone design, needs no interfacing or IT set up

Medication Packaging Software

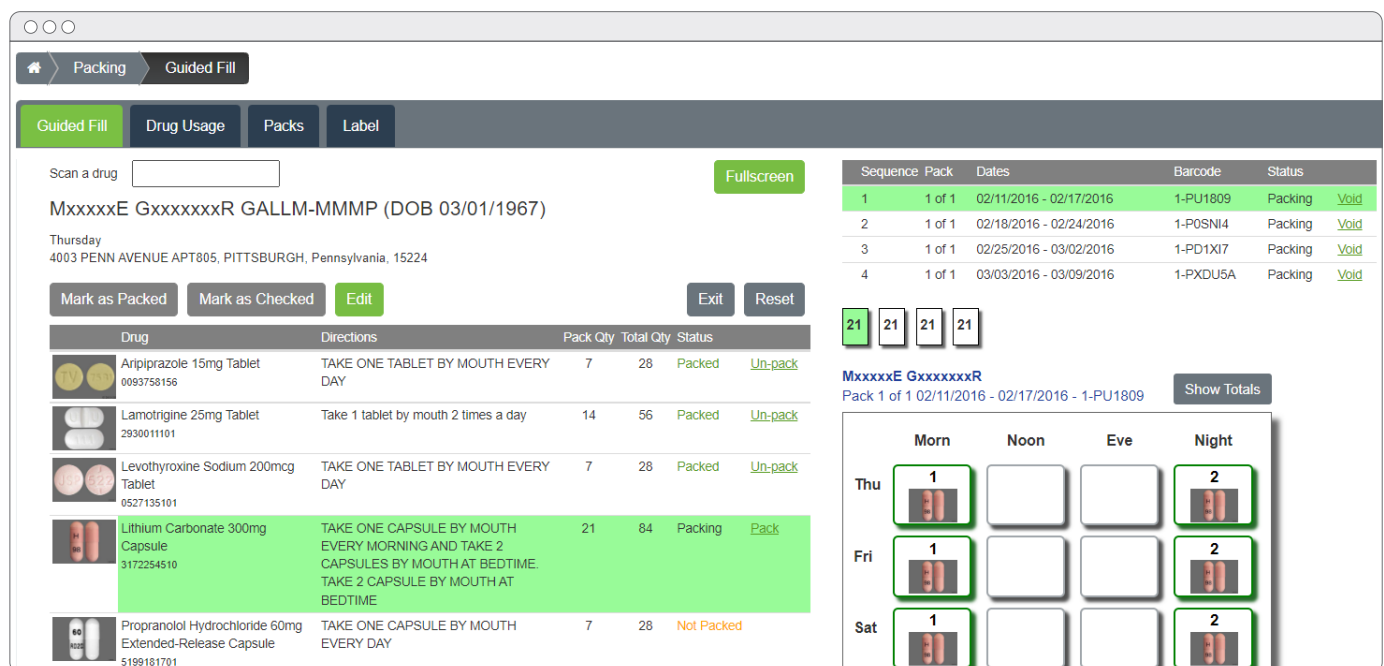

Omniceil's Guided Packing Software solution allows pharmacies to provide differentiated MultiMed adherence packaging services quickly and seamlessly.

Improved Workflow

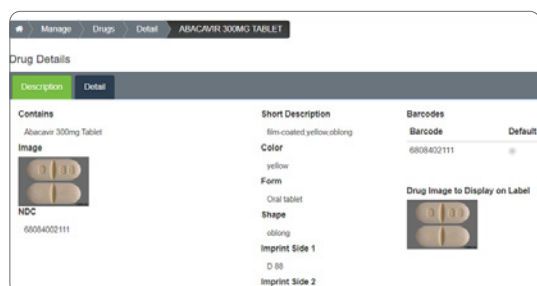

Guided Packing web-based software allows pharmacies to improve SureMed MultiMed blister card fill throughput with one-step labeling and elimination of double data entry.

Key Features

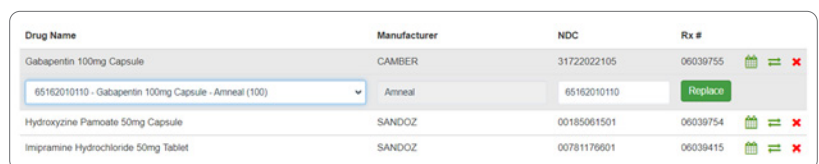

- Seamlessly integrates with:
 - Pharmacy Information System allowing you to generate a patient-specific label
 - Drug databases, enabling NDC substitutions and inclusion of OTCs
 - EMAR barcode technology
- Configure your SureMed cards using the Guided Packing card customization and labeling options

Guided Packing fill screen

Drug substitutes easily identified

Medication Packaging Automation

Omnicell's portfolio of medication packaging automation solutions help pharmacies package medications accurately and efficiently, supporting inventory optimization and encouraging better patient medication adherence.

MTS-350 Semi-Automated Filler and Sealer

Gain operational efficiency by optimizing your pre-pack workflow. The Omnicell® MTS-350™ is a flexible, easy-to-use filler and sealer capable of filling most oral medications into a variety of single dose blister card packaging. By enabling your pharmacy technicians to package more than 240 cards per hour, the MTS-350 helps you achieve significant operational efficiency within your pre-pack operation.

Features

- Package up to 10 times faster than by hand
- Fill a wide range of medications and packaging styles
- Use minimal operator motion
- Provide consistent, quality sealing with temperature and time controls
- Eliminate blister card pressure variant using robust automated sealing station

Benefits

- Motorized tablet filling system with adjustable speed and easy-to-change brushes
- Tool-less filling system change-over
- Seal station automatically opens when the cycle is complete
- Easy-to-read digital temperature controller
- Stainless steel and anodized aluminum construction allows for easy cleaning

Site Requirements

Dimensions

33"H x 38"W x 28"D

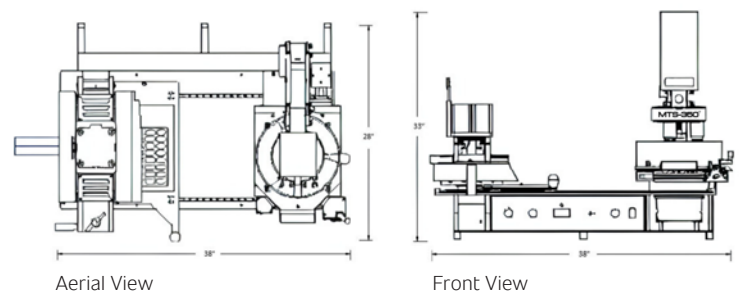

Weight: 110lbs

Air Requirements

Compressor Power minimum 1 HP; Compressed Air 90-100 PSI, Air Flow .5 SCFM, Reserve Tank 15 Gallon

Electrical Requirements

220-240 VAC 50/60 Hz, 10 Am max,
Supplied country-specific power cord

Omnicell's Desktop Label Applicator (DLA) applies labels immediately after the packing process, making it an ideal addition to the MTS-350 for completing your pre-packing operations. Learn more about the DLA on page 125

MTS-500 Semi-Automated Filler and Sealer

Improve packaging efficiency in higher-volume operations. Designed to streamline packaging for Correctional and LTC Pharmacies, the MTS-500™ Semi-Automated Filler and Sealer is capable of producing approximately 850 completed single dose medication blister cards per hour.* That's up to 34 times faster than packaging by hand, creating greater efficiency for your pharmacy. All settings are preprogrammed, making it simple to operate.

Features

- Motorized medication filling system with adjustable speed and easy-to-change brushes
- Tool-less changeover of the filling system
- Easy-to-read digital temperature controller
- Stainless steel and anodized aluminum construction allows for easy cleaning

Benefits

- Improves labor efficiency through high-speed packaging
- Simplifies packaging of high-volume medications in single dose cards
- Automates pre-pack labeling and barcoding
- Increases flexibility with plate-based filling system

Site Requirements

Dimensions

5.5'H x 6.2'W (with printer) x 7.2'D (with printer)
Weight: 1,200lbs

Air Requirements

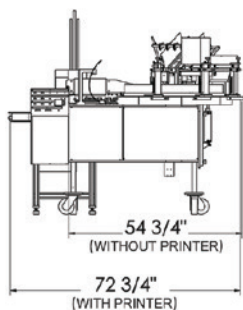

Compressed Air 100 PSI, 15 SCFM

Electrical Requirements

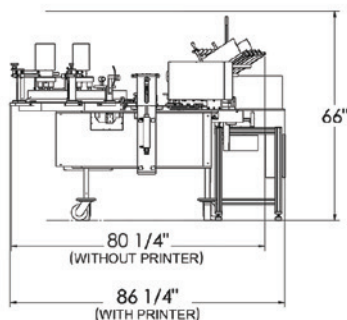

240 VAC, 1Phase, 20 amps

Adjustable Temperature Range

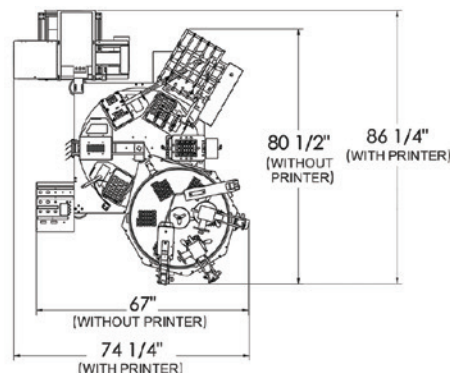

Max 400°F

Front View

Back View

Aerial View
Note: Allow additional 2-foot walkaround each side.

*Max per hour is one technician filling the same drug without medication changes with optimal conditions.

AccuFlex Single Dose Automation

Flexible patient-specific and pre-pack automation. The Omnicell AccuFlex® accurately fills and labels single dose packaging based on incoming prescriptions or pre-pack orders, improving operational efficiency and reducing inventory and labor costs. This high-speed packaging technology comes with software, reports, formulary management, inventory management, custom labeling and foil formatting, installation, and training.

Solution Benefits

- Fills and labels any quantity based on calendar, cycle, or pre-pack
- Throughput of 3.5 filled, sealed, and labeled cards per minute
- Can enable PV2 exemption to maximize workflow and labor efficiency
- Patient-specific blister card filling and labeling

Features

- Interfaced with your Pharmacy Information System
- Automated barcode verification and tracking
- Cassette inventory tracking
- Detailed and custom reports

Site Requirements

Dimensions

8'H x 11.8'W x 12'D

Packager clearance space for service: 15' x 15'

Network Connection Requirements

1 between machine and facility

1 for workstation

1 for server

1 for network printer (optional)

Air Requirements

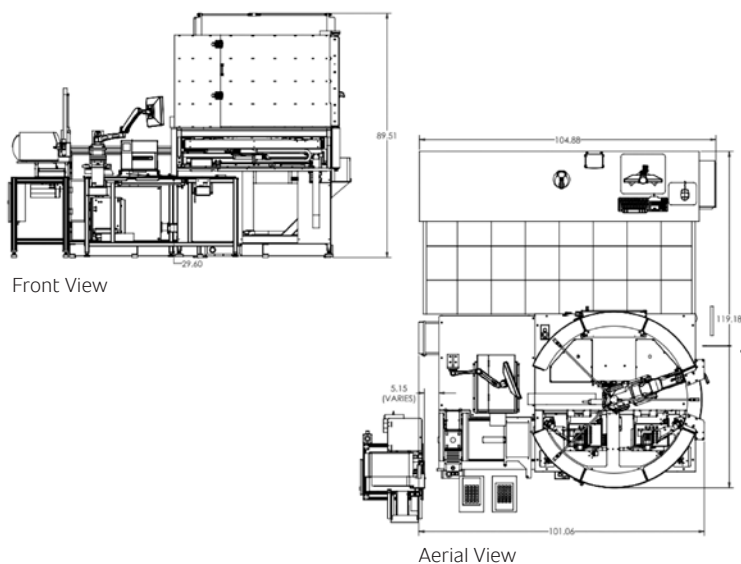

15 CFM at 100 PSI. Minimum supply of 60 gallons and an air dryer

Electrical Requirements

Packager: 220/240 VAC at 60-amp, single-phase power with disconnect box

Ingress Requirements

Once unloaded, the AF3 and components will require a pathways of 96"H x 64"W to move the system to its location

E3 Single Dose Automation

Accelerate single dose blister card fulfillment. Imagine having a faster way to fill single dose blister cards, so you have more time for clinical work that helps patients. With a throughput of 10 cards per minute, Omnicell Express III (E3) Single Dose Automation is the fastest fully automated solution for LTC pharmacies and their customers. The time savings from the Omnicell E3 can help you grow your pharmacy business without adding personnel. You can increase profits by decreasing operational expenses and driving down cost per script associated with filling, sealing, labeling, and verifying blister cards.

Solution Benefits

- Maximize workflow
- Improve pharmacy productivity
- Increase profitability
- Scale efficiently
- Can enable PV2 exemption to maximize workflow and labor efficiency

Features

- Throughput of 10 cards per minute
- 374 cassette locations
- Customized label and foil
- Automated barcode verification and tracking
- Detailed and custom reports available
- Multiple workstations to improve efficiency by separating tasks

Site Requirements

Dimensions

9'H x 20'W x 12.8'D

Total Space Requirements: 20' x 30'

Network Requirements

1 Network connection between machine and facility LAN for data transmission

Minimum of three Gigabit network drops:

1 for E3

1 for workstation (within the work area of the E3)

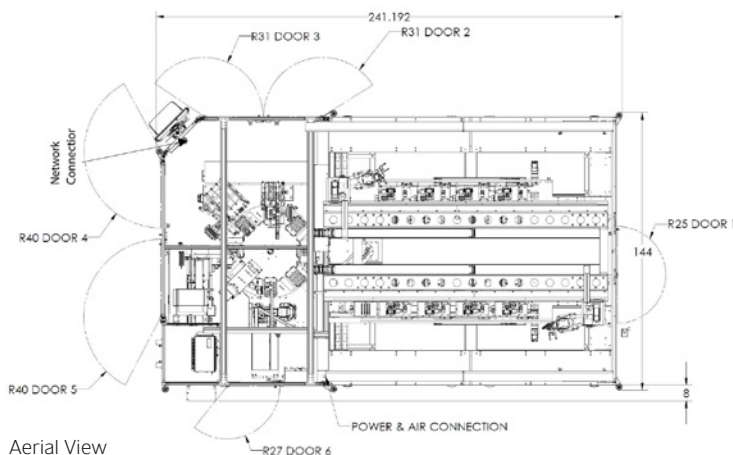

1 for Server

Air Requirements

27 CFM at 90 PSI (140 PSI max)

Electrical Requirements

Packager 220/240 VAC at 60-amp, single phase

Automated Dispensing Cabinets

The award-winning XT Automated Dispensing System is at the center of Omnicell's portfolio of automation, intelligence, and technology-enabled services, helping your clinicians reallocate time to higher-value work.

XT Automated Dispensing Cabinet

Achieve smarter and safer medication management for non-acute and alternate site care settings with Omnicell's award-winning XT Automated Dispensing Cabinet System.

- Highest capacity on the market
- Metal locking lid drawers for security and safety
- Simple user workflows for improved efficiency
- A flexible and scalable design to adapt to changing medication needs

For more information about Omnicell's XT Automated Dispensing Systems, reach out to MAInsideSales@Omnicell.com.

Printing & Labeling Solutions

Omniceil delivers high-quality prescription labels and custom printing solutions that streamline pharmacy workflows and ensure accuracy and efficiency with every prescription.

**Label images in the printed catalog are shown at actual size, making it easy to compare options. For exact measurements, please check the size specifications printed next to each label, as digital versions may not display labels to scale.*

Unit Dose Foil Labeling System

Omniceil's unit dose foil labeling system meets the unique needs of the long term care pharmacy by producing high quality bar code scannable label sheets quickly and efficiently. This standalone system prints foil lidding containing all pertinent drug information and barcodes.

- Accommodate diverse packaging needs including unit-dose box, short-cycle dispensing, reclaimable blister cards, eKits and automated dispensing cabinets
- Reduce waste by pre-packing expensive medications into reclaimable blister cards (as allowed by state regulations)
- Track log numbers and expiration dates using barcode technology, with option of printable daily production report

Included

- Tharo H627 – 203 dpi thermal transfer printer
- Rotary cutter
- Labeling software program with database and report generator
- Barcode scanner with cable and stand
- Communication cables

Usage

This high-speed durable printer prints up to 18 sheets of Omnicell foil (576 unit doses) per minute. The printer automatically cuts the foil to size, making it ready for direct application to the unit dose blister. The Unit Dose Foil Labeling System can be used standalone or in conjunction with Omnicell automation.

Kyocera EcoSys P8060CDN

Required for SureMedXL (309-96GLB)

Epson EP-C7000

Used for SureMed Standard (300-96), SureMed Plus (301-96),
SureMed 30 (302-96)

Desktop Label Applicator (DLA)

Omniceil's Desktop Label Applicator System automates the labeling process for pre-pack operations, reducing labor time and increasing efficiency. The high-speed applicator system applies labels immediately after packing, ensuring perfect placement every time. With options for semi-automatic and fully automatic systems, we offer solutions to meet your pharmacy needs.

Solution Benefits

- The perfect complement to Omnicell's MTS-350 to complete your pre-packing operations
- Color touch screen interface
- Standard low ribbon and low label sensing
- On-screen troubleshooting and diagnostic tools
- Realtime running statistics including batch/shift counts, parts per minute statistics and machine life counts
- Course and fine adjustments to accommodate various label placements

DLA200 – Fully-Automatic

Site Requirements
