

CENTRAL PHARMACY MANAGER MOBILE WORKSTATION

Streamline Order Fulfillment and Inventory with Mobile Workstation

Managing pharmacy distribution for an entire health network from a single, centralized location can deliver numerous benefits – from reductions in overhead costs to simplified inventory management. Ensuring success with this model requires specialized tools that allow your staff to maximize efficiency and productivity in a Centralized Services Center (CSC). Omnicell's Central Pharmacy Manager (CPM) Mobile Workstation untethers technicians from fixed terminals, allowing them to go where the medications are to accelerate order fulfillment.

Features

- System consists of an All-In-One (AIO) computer workstation (monitor, keyboard, mouse, bio-id, printer, and scanner), a cart on wheels, and bin storage
- Integrated with the latest version of Central Pharmacy Manager (CPM), Omnicell's pharmacy inventory management system, to support enhanced data processing
- Wi-Fi-enabled for maximum flexibility
- Dimensions: 46"L/ 28"D/ 38"H
- For use with static shelving in CSCs
- Battery runtime of 8 hours
- Hot-swappable batteries to reduce downtime
- Durable welded steel chassis to withstand industrial environments
- Smooth swivel casters with total lock and directional lock capability to prevent unintended movement and ensure safety of staff

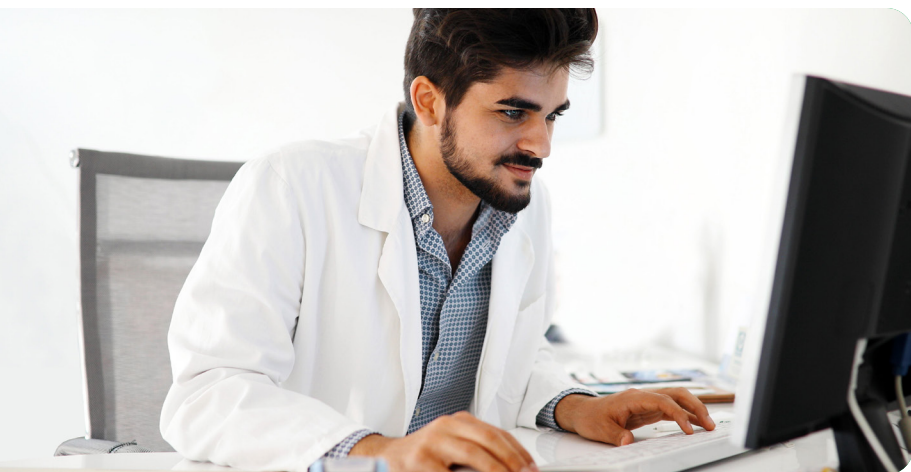

Benefits

Omniceil's CPM Mobile Workstation is specifically designed for CSCs and central fill pharmacy environments, providing powerful on-the-go data processing capabilities that allow you to enhance labor efficiency and maximize economies of scale. Benefits include:

- A mobile design that allows technicians to move freely in a CSC, expediting order fulfillment and inventory management
- 8 hours of battery life reduces downtime and maximizes shift productivity
- Integration with CPM streamlines inventory management across the enterprise

Give your Centralized Services Center staff the freedom to go where the meds are to accelerate order fulfillment.
