

Central Pharmacy Blister Packager

Gain Operational Efficiency By Optimizing Your Unit Dose Workflow

For pharmacies that buy medications in bulk, the Central Pharmacy Blister Packager is a flexible solution that supports virtually all oral solid sizes and types for unit dose packaging. It delivers a throughput of up to 100 doses per minute, enabling significant efficiency for your oral solid packaging operation.

Features

- Fill a wide range of medications and packaging styles
- Use minimal operator motion
- Provide consistent, quality sealing with temperature and time controls
- Eliminate blister card pressure variant using robust automated sealing station

Benefits

- Packages unit dose from bulk purchases of medications
- Unit doses can be loaded into automated dispensing cabinets or stored in carousels and Omnicell® XR2 robots
- Speeds up packaging of unit dose medications
- Provides consistent sealing with temperature and time controls
- Integrates with Central Pharmacy Manager to leverage the same platform used across your pharmacy automation
