

DESKTOP LABEL APPLICATOR SYSTEM

Reduce Labor and Increase Efficiency with Automated Medication Labeling

Omnicell's Desktop Label Applicator System automates the labeling process for pre-pack operations, reducing labor time and increasing efficiency. The high-speed applicator system applies labels immediately after packing, ensuring perfect placement every time. With options for semi-automatic and fully automatic systems, we offer solutions to meet your pharmacy needs.

Solution Benefits

- The perfect complement to Omnicell's MTS-350 to complete your pre-packing operations
- Color touch screen interface
- Standard low ribbon and low label sensing
- On-screen troubleshooting and diagnostic tools
- Realtime running statistics including batch/shift counts, parts per minute statistics and machine life counts
- Course and fine adjustments to accommodate various label placements

Features

DLA100 - Semi-Automatic

- Simple one hand operation
- Insert the card to activate the labeling process

DLA200 - Fully-Automatic

- 4 ½" wide x 30" grip belt conveyor
- Single touch on/off conveyor activation
- Sensor activated in line card application process

DLA200 - Fully-Automatic

Site Requirements
