

MEDCHILL

Powerful Inventory Management for Temperature-Sensitive Medications

Medical-grade refrigerators provide temperature controls but do not meet the medication safety and security standards that are only possible when managing individual medication line items.

Clinical teams have developed workarounds in response, but these efforts lack the efficiency and tracking available with automated medication management while sapping precious time from nurses and pharmacists.

Omnicell's MedChill provides line-item level storage, access, and tracking in medical-grade refrigerator—eliminating the need for workarounds by delivering the capabilities of automated dispensing cabinets for temperature-sensitive medications. MedChill helps hospitals advance safe medication storage, meet regulatory requirements, control inventory, and optimize nursing and pharmacy workflows.

Out-of-the-Box Integration with Follett

MedChill is available exclusively as a paired offering with Follett refrigerators. This powerful partnership delivers a turnkey solution for your refrigerated medications complete with an integrated locking system designed for added security. Available in two sizes, Follett refrigerators feature “infinite” variable speed control technology to deliver the precise amount of refrigeration needed for optimal temperature performance.

MedChill is also available in multiple drawer and bin configurations to meet your medication dispensing needs.

Amplify Outcomes with MedChill

MedChill provides your health system with numerous benefits including:

Safe Medication Management and Storage

Software and automated drawers inserted into your refrigerator control storage and tracking

Regulatory Compliance

MedChill allows for cabinet-level management of cold-storage medications in compliance with ISMP guidelines and other regulatory standards

Streamlined Workflows

Optimized storage and processes eliminate workarounds, unnecessary restocks, and excessive cycle counts

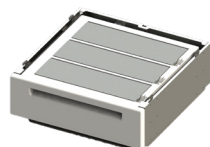

Optimal Inventory and Cost Management

Ensure the right medications are available when patients need them, while also helping to manage inventory costs

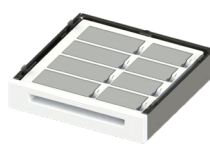

3-Bin Drawer

Drawer: 17" x 17"
Bins: 12" wide x 3.5" high x 5" deep

8-Bin Drawer

Drawer: 17" x 17"
Bins: 7" wide x 2.5" high x 2" deep

Upright Refrigerator

Four-drawer configuration,
