Omnicell®

CENTRAL PHARMACY MANAGER

Take a Leaner Approach to Inventory Management

Effective inventory management is critical to the success of any high functioning pharmacy. Omnicell's Central Pharmacy Manager is designed to streamline pharmacy inventory management and drive efficiency throughout your medication distribution process.

Streamline Medication Management

Central Pharmacy Manager enhances pharmacy operations by:

- Automating inventory management

- Saving staff time by reducing manual processes

- Reducing costs through automated ordering and reconciliation

## Inventory Management Across the Enterprise

Central Pharmacy Manager is designed to scale to a health system's current and future needs.

The software supports "hub and spoke" distribution for both cartless and cartfill models and can scale to meet the needs of large centralized service centers. An interface with TrackTraceRX and LSPedia also ensures the required data is captured to ensure compliance with The Drug Supply Chain and Security Act (DSCSA).

Maximize Staff Efficiency and Accuracy

Central Pharmacy Manager enables pharmacies to streamline their medication management processes from order reception through dispensing by:

- Promoting consistent patient, user, and formulary information

- Providing total inventory visibility across medication dispensing systems

- Increasing data accuracy, which helps eliminate billing errors

Defining. Delivering. Outcomes.

Integrate with Robotics and Smart Devices for Further Benefits

While Central Pharmacy Manager software can be used on its own to improve workflow, it can also harness the benefits of automated devices, such as pharmacy carousels, our XR2 robot, and packaging technology to deliver more comprehensive medication inventory management. The use of automation can greatly improve staff productivity and help reduce medication errors.

XR2 Automated Dispensing System

- Supports both cartless and cartfill distribution strategies through unit-dose and multi-dose dispensing

- Eliminates human error with 100% barcode scanning

- Dispenses soonest-to-expire medications to reduce waste

Pharmacy Carousel

- Color LED navigation display panel with icons and alerts to guide technicians through picking and stocking tasks

- Maximizes floor space and storage capacity

- Intuitive user interface on the new 12" operator panel

Medication Packager

- Improves dispensing accuracy to enhance patient safety

- Minimizes technician time spent on repackaging medications

Central Pharmacy Blister Packager

- Packages most types and sizes of oral solids; multiple blister sizes

- User customizable labels
