Omnicell® Supply Solutions

Improve Patient Care and Operational Efficiency
Supplies are the second leading cost to hospitals after labor in providing patient care.\(^1\)

**How Do You Begin to Control Costs?**

By automating manual processes and providing real-time inventory data, Omnicell® point-of-use supply chain management systems allow you to:

- **Lower** costs by reducing consumption and inventory levels
- **Increase** revenue through accurate charge capture
- **Improve** nurse workflow and patient safety by ensuring availability of essential medical supplies
- **Simplify** reporting, analysis, and charging
- **Enable** inventory efficiency at a system level

Our supply solutions effectively solve inventory challenges, and enable you to easily track and report your financial success gained from the system.

- **Omnicell Supply Management** for the medical surgical area
- **OptiFlex™ Procedure Systems** for the OR and procedural areas
- **Pandora® Financials** analytics software

---

**Omnicell Supply Solutions Tailored to Your Workflows**

---

**How Can You Reduce Stockouts Without Increasing Costs?**

Add market-leading Pandora Financials analytics software to Omnicell supply systems to make real progress on cost containment of supplies and medications. The Pandora dashboard provides actionable demand management analysis to help you make the right decisions for controlling inventory. You can easily track data such as total inventory costs, location-specific inventory turns, and costs per case or patient stay.
A System That Helps Rather Than Hinders Nurses.

Omnicell Supply Management is an easy-to-use tool that ensures nurses consistently have the supplies needed to support patient care. Supplies can be accessed from open shelves and secure cabinets, and the system can be customized by size, security, and configuration, allowing flexibility when designing your supply management workflow.

- **Omnicell Supply Management** is available as a standalone system or as a simple adjunct to your existing Omnicell medication management systems
  - **Touch & Go™ G4** biometric ID helps to streamline workflow efficiencies with increased security
  - **Verbal confirmation** for logon, expired products, and latex warnings
  - **2-D bar code scanner** supports GS1 and HIBC standards for data parsing and capture
- **Combination medication and supply** cabinets reduce storage footprint
- **Cloud Connect** allows you to manage Omnicell open and secure stations outside of the hospital wide area network (WAN), including those residing in different time zones*
- **OmniCenter® server** with a robust seven-year data storage capability

*e.g., physician offices, long-term care facilities, and institutional pharmacies.

32% Reduction in inventory consumption.²

"Before Omnicell, everything was done manually. Because we did not have a good way to manage supply inventory in the ORs, we had overstocks, we ran out of items, and there were plenty of mischarges."³

---

Surgical Services (SS)—Perpetual Inventory Management With Automated Physician Preference Cards

- Inventory levels are continually updated during the entire case management process, from pre-picking to post-case reconciliation.
- Unique surgical case bar code lets you know exactly what operating room supply costs are incurred in each case.

Cath Lab (CL)—Ideal for Laboratory and Materials Managers

- Designed for the unique workflows of specialty areas such as catheterization laboratory, diagnostic and interventional radiology, electrophysiology, and endoscopy.
- Track all supplies and procedures back to the case, physician, patient, and technicians.
- Easily parse and capture lot, serial number, and expiration date off package bar code.

Eliminate tedious manual tracking of physician preference cards with Surgical Services (SS).
Flexible Configurations to Fit Your Needs

Flexible, scalable Omnicell supply systems can be used with secure cabinets or open shelving—or a combination of the two. Omnicell cabinets come in a wide range of configurations and various options help you further customize the system for each area.
