

How can you reduce costs and enhance safety through in-house sterile compounding? Omnicell Robotic IV Insourcing Solution

RIIS above outsourcing and manual compounding

Omnicell's Robotic IV Insourcing Solution™ (RIIS) is a comprehensive, turnkey approach to insourcing your sterile compounding.

Advanced IV robotic technology, novel data services and application support, and expertly trained pharmacy technician staff are all provided as part of a simple monthly fee, at a fraction of your outsourcing spend.

Adopting and leveraging advanced IV robotic technology has never been easier or faster. Omnicell can provide everything you need to insource your sterile compounding - creating a safer, more accurate and more cost-effective IV pharmacy.

Technology : advanced, fully automated IV robotic technology

Tools : novel data services, application support and the expertise to best leverage automation technology

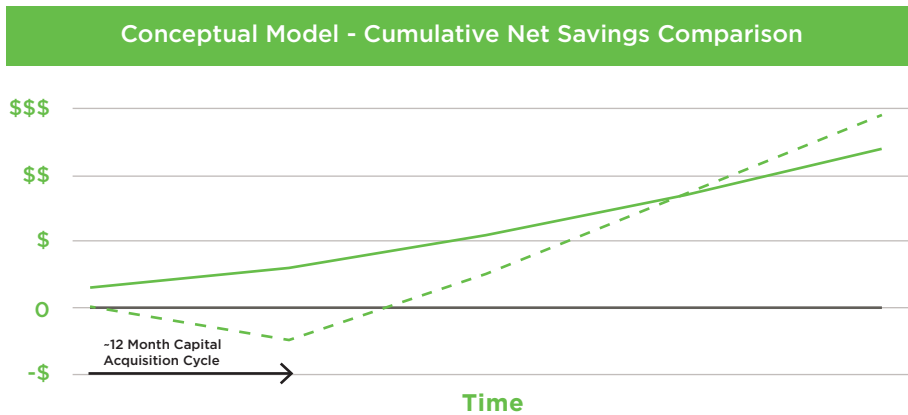

Technicians : expertly trained pharmacy technician staff to maximize performance of the technology while freeing up your staff for more value-added work

Experience the benefits of RIIS.

REDUCE COSTS.

RIIS is cash flow positive from day one, and provides everything you need to insource your IV compounding operation with no up-front capital expense. The technology, tools and expertly trained pharmacy technician staff are all provided as part of a simple monthly fee, allowing you to utilize your existing operational budget at a fraction of your outsourcing spend.

RIIS reduces overall operating spend and provides a turnkey solution for insourcing your IV compounding that is cash flow positive from day one.

CAPITAL acquisition processes may take 12+ months before you can recognize the cost savings associated with insourcing.

OUTSOURCING provides no opportunity for reducing drug spend and leaves hospitals vulnerable to unexpected price increases.

ENHANCE PATIENT SAFETY.

Advanced IV robotic technology prepares ready-to-administer IV doses in a fully automated ISO Class 5 environment, eliminating the most common sources of contamination, providing drug verification and documentation, delivering exceptional accuracy and reducing errors through automated labeling.

TAKE CONTROL AND MITIGATE RISK.

RIIS allows you to reduce reliance on outsourcing and take control of one of the most critical areas of your pharmacy. By partnering with Omnicell and insourcing your IV compounding, you will have guaranteed minimum production volumes and mitigate risk across the board. Extended beyond use dating helps to reduce waste and enables a seamless transition to insourcing.
