

# Omnicell Medication Automation Training

*"I really appreciated the ability to take the class from my workplace rather than have lengthy travel to another location. The live interaction and views of the instructor's computer page create a literal classroom within my own office."*

*Alysha Pacheco, Pharmacy Informatics*

## Subscription Training Program for System Administrators

You've invested in Omnicell® medication dispensing technology to improve processes within your institution. To achieve the benefits, you need to get staff up to speed quickly. But after their initial training, how can your existing staff retain and build on their knowledge over time? And how will new employees get trained?

Omnicell's subscription training program offers a comprehensive, sustainable approach to training that addresses these issues, so you can maximize your investment in the long run.

### The Right Training at the Right Time

**18-Month Subscription:** Our flexible subscription training model enables your staff to engage in training how and when they want it. Participants can take an unlimited number of training sessions throughout the 18-month subscription period, allowing them to build on their skills and stay up to date with Omnicell technology. This all-inclusive program means there is no additional fee for training new employees.

### Flexible, Sustainable Training:

- Courses include virtual instructor-led sessions and classroom workshops at Omnicell.
- Any system administrator or super user in the facility can attend as many training courses as desired for the length of the subscription.
- Courses cover pre-installation basics through advanced topics and upgrade instruction.
- This blend of learning opportunities supports sustained learning, helping you achieve maximum potential from your Omnicell systems.

### Virtual Instructor-Led Sessions

These shorter sessions focus on specific topics or tasks. Participants have the convenience of training from their own work environment, along with the benefits of instructor guidance and interaction.

### Classroom Workshops

These in-depth courses take place at Omnicell headquarters in Mountain View, California, where participants can focus on learning away from the distraction of their everyday work environment.

*"Omnicell training was clear, concise, informative, and engaging. The trainer was truly knowledgeable and presented effectively on all aspects of the product."*

**Nilesh Desai, RPh, MBA, Director of Pharmacy**  
*Hackensack University Medical Center*

## Subscription Training Program—How it Works

When you subscribe to the Subscription Training Program for System Administrators you will receive an education kit that includes:

- System Administrator Education Pass *(for the facility)*
- Headset for attending virtual training
- Training roadmap with recommended sequence of courses

The pass enables any system administrator or super user in the facility to register for training courses throughout the 18-month subscription period. *(Please note there is a limit of two attendees per facility at each training event.)* The roadmap provides guidance on course sequence to aid in planning, but you can customize your own curriculum to best fit your needs.

## OnSite Training Program Option

For an additional fee, Omnicell provides training on site, where an experienced trainer will conduct workshops from the convenience of your facility. The intensive instruction is geared for small groups and can be customized to meet specific training needs. Typically, two-day or three-day workshops are offered.

## Omnicell Education and Training Services

Omnicell's Education and Training Services team offers a comprehensive curriculum of courses in a variety of formats to help you gain the most benefit from your Omnicell systems. Classes are taught by knowledgeable instructors with real-world experience who understand how Omnicell systems are used in healthcare facilities.
